

Pet care protocol

Pet owners are encouraged to have a go bag for each pet to include immediate water and food needs for a minimum of three days. A leash and collar per pet will be required at each shelter area.

A small supply of dog food will be stored in each shed.
(none currently)

Distribution will be supply divided by number of animals with size of portion considered.

Find animal bowls for water or food stored in the sheds.

The long-term support for domestic pets includes possible food drops per Tillamook County drone after an unknown amount of time. **This is only a possibility not a probability.** Hunting for pet food will probably be the only option to feed our pets.

An outside fenced venue may be available post event at the property of a current Cape Meares neighbor. This neighbor encourages each pet visitor to be supervised by the pet owner.
